Introduction:

A YoLink Hub, that talks to you, and plays attention-getting tones or sounds (you decide!). SpeakerHub has text-to-speech capabilities, to turn your phrases into spoken words. SpeakerHub also allows you to choose from built-in tones and sounds, or upload your own audio files!

A YoLink Hub or SpeakerHub is required for your YoLink devices to function fully, including connecting to the app.

The hub is the only device that connects to the internet. SpeakerHub requires a WiFi connection. 2.4 GHz, only.
