

BULLDOG VALVE ROBOT

MOTORIZED BALL VALVE OPERATOR

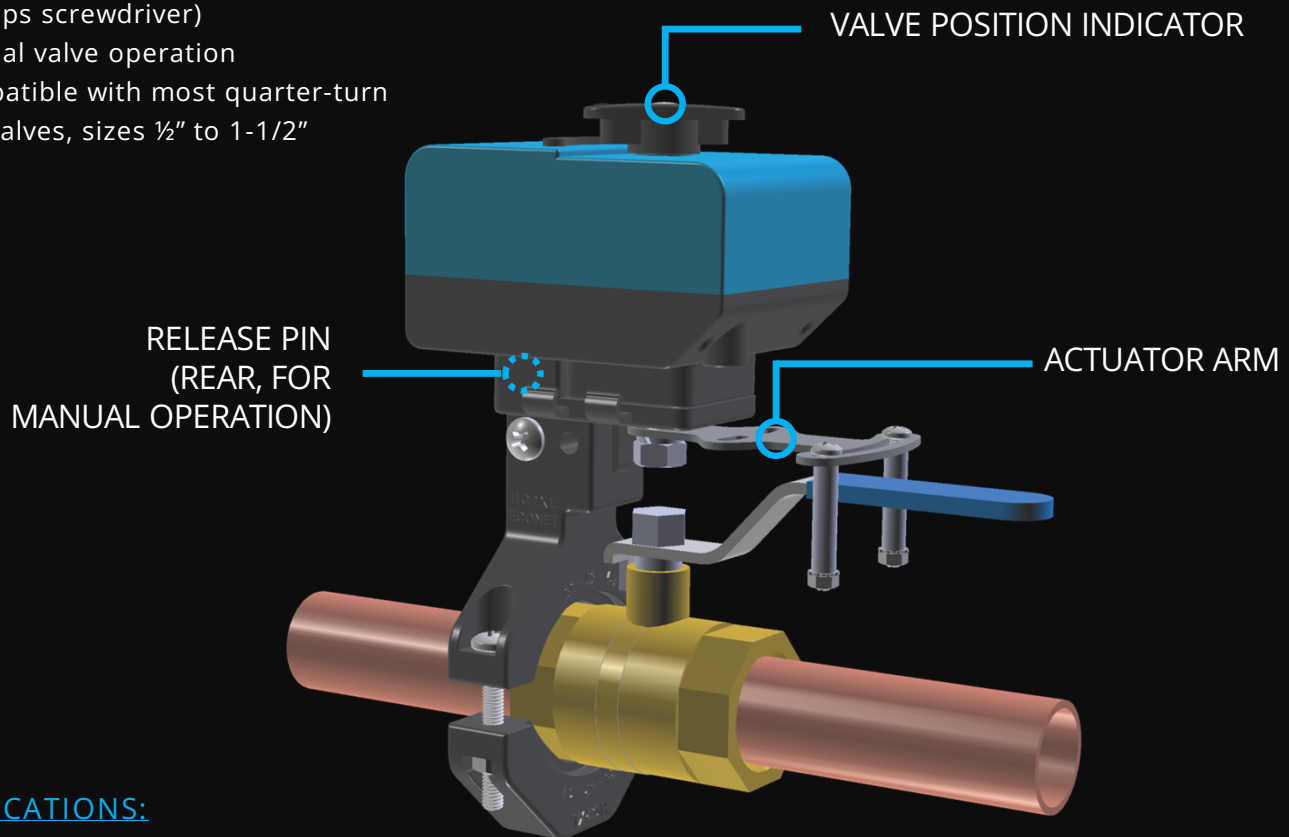

YOLINK

INTRODUCTION:

The Bulldog Valve Robot is a 12VDC bolt-on operator/manipulator for standard quarter-turn ball valves. The Bulldog is a non-smart device that must be used in conjunction with a YoLink smart valve operator

FEATURES & BENEFITS:

- Simple, one-tool installation (Phillips screwdriver)
- Manual valve operation
- Compatible with most quarter-turn ball-valves, sizes 1/2" to 1-1/2"

SPECIFICATIONS:

MOTOR: High Torque Geared Valve Motor

VOLTAGE: 12VDC (Supplied by Controller, Required, Not Shown)

VALVE CONTROL CABLE: 2-Conductor Cable, 28" (700mm) Long, w/Watertight Connector

VALVE STATUS CABLE (Some Models): 3-Conductor Cable, 28" (700mm) Long, w/Watertight Connector

COMPATIBLE VALVES: Supports 1/2", 3/4", 1", 1.25" and 1.5" Ball Valves

ENVIRONMENTAL: 32 to 122°F (0 to 50°C)
