

Smoke Alarm

YS7A02 & AJ-732

Quick Start Guide

Revision Jan. 16, 2023

Welcome!

Thank you for purchasing YoLink products! We appreciate you trusting YoLink for your smart home & automation needs. Your 100% satisfaction is our goal. If you experience any problems with your installation, with our products or if you have any questions that this manual does not answer, please contact us right away. See the Contact Us section for more info.

Thank you!

Your Smoke Alarm connects to the internet via a YoLink hub (SpeakerHub or the original YoLink Hub), and it does not connect directly to your WiFi or local network. In order for remote access to the device from the app, and for full functionality, a hub is required. This guide assumes the YoLink app has been installed on your smartphone, and a YoLink hub is installed and online (or your location, apartment, condo, etcetera, is already served by a YoLink wireless network).

In the Kit

Communication Base

Smoke Head AJ-732

Two AA Batteries (Installed)

Quick Start Guide

Phillips Screws (2)

Trouble (Head Must be Replaced)
- 1 Yellow LED Flash**
 2 Chirps, 60 Second Pause
Head End-of-Life (Head Must be Replaced)

F Power Up

F Install the App

If you are new to YoLink, please install the app on your phone or tablet, if you have not already. Otherwise, please proceed to the next section.

Scan the appropriate QR code below or find the "YoLink app" on the appropriate app store.

Apple phone/tablet
iOS 9.0 or higher

Android phone or
tablet 4.4 or higher

Open the app and tap **Sign up** for an account. You will be required to provide a username and a password. Follow the instructions, to set up a new account. Allow notifications, when prompted.

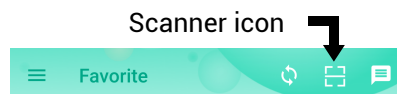

You will immediately receive a welcome email from no-reply@yosmart.com with some helpful information. Please mark the yosmart.com domain as safe, to ensure you receive important messages in the future.

Log in to the app using your new username and password.

The app opens to the **Favorite** screen. This is where your favorite devices and scenes will be shown. You can organize your devices by room, in the **Rooms** screen, later.

G Add Your Communication Base to the App

1. Tap **Add Device** (if shown) or tap the scanner icon:

2. Approve access to your phone's camera, if requested. A viewfinder will be shown on the app.

3. Hold the phone over the QR code so that the code appears in the viewfinder. If successful, the **Add Device** screen will be displayed.

You can change the device name and assign it to a room later. Tap **Bind device**.

If successful, the screen will appear as shown. Tap **Done**.

4. Confirm the device is noted as online per the figure above, before proceeding to the next section. Repeat the Power Up step, as needed.

H Installation

Before physically installing the device, please review the guide included with the smoke head, in particular, location considerations. We suggest reviewing the full installation guide, as well. Please refer to the product support page for additional information. It is also recommended that you configure and test your Smoke Alarm prior to installing it.

1. You must activate the head before installation. Depress the Activation Button on the head. This is a one-time button that remains depressed. Pressing this button activates the head and starts the End-of-Life timer, so do not press this button until you are ready to install the device.

2. "Bench test" your new Smoke Alarm before installation. Twist the head into the base until it snaps in place and is not loose. Press the test button on the top of the head, until the alarm sounds and the LEDs flash. Check and confirm the alarm is displayed in the app, as well. Confirm this result before proceeding to the next step.

3. Determine the appropriate location for your Smoke Alarm. Review the guide packaged with the head, as well as information in the full installation guide and the product support page.

4. Remove the head from the base, as required. Secure the base to the ceiling or wall, using the two supplied screws and anchors, or using your own specialty anchors (e.g. toggle bolts or concrete anchors).

5. Twist the head into the base.

6. Test the device.

Refer to the full Installation & User Guide, to complete the setup of your Smoke Alarm.

I Contact Us

We are here for you, if you ever need any assistance installing, setting up or using a YoLink app or product!

Need help? For fastest service, please email us 24/7 at service@yosmart.com

Or call us at **831-292-4831** (US phone support hours: **Monday - Friday, 9AM to 5PM** Pacific)

You can also find additional support and ways to contact us at:
